## CHEWABLE BACTERIAL REPLACEMENT FORMULA

---

MICROBAC 1 is a unique combination of “friendly” bacteria for normalizing the mouth, throat and upper stomach for the control and elimination of harmful organisms. MICROBAC 1 succeeds because of its unique combination of multiple balanced bacterial strains that specifically re-colonize the upper intestinal tract effectively. The distinctive strains of bacteria in MICROBAC 1 have the following capabilities:

1. Facilitate the favorable bacterial growth for colonization of the entire gastrointestinal tract
2. Normalize intestinal pH values throughout the entire intestine
3. Inhibit harmful micro-organism growth because of its ability to normalize the acid/base balance by producing enzymes and because it colonizes so rapidly
4. Production of large amounts of enzymes which facilitates the colonization of favorable bacteria for digestion of protein, carbohydrates and fats
5. Cellulose production for complete digestion of vegetable matter
6. Produces enzymes which in turn dissolves free radicals and allows for easier elimination
7. Marked reduction of intestinal toxicity, including ammonia

### INGREDIENTS:

Each chewable tablet contains:		% Daily Value
In a proprietary blend of:	120 mg	*
Acidophilus, probiotics, and enzymes		

\*Daily Value not established

Other Ingredients: Maltodextrin, vegetable stearate, and flavoring.

No wheat, corn, soy, salt, yeast, egg, whey, milk, colors, chemical additives, or preservatives.

### INDICATORS:

MICROBAC 1 is helpful for conditions involved in the re-colonization of the upper intestinal tract and when regular Lactobacillus cultures are ineffective. It is recommended for:

1. Candidiasis
2. Post-antibiotic therapy
3. Improper diet containing animal fats, additives, sulfites and processed foods
4. Intestinal infection (Giardia, influenza, food poisoning)
5. Colitis, Diverticulitis, irritable bowel syndrome
6. Stress

**Potency Guaranteed:** All the bacteria in this product have been included at their most effective clinical potency, and will maintain this potency at room temperature for 1 year from purchase. Refrigeration will assist in maintaining this potency.

### DIRECTIONS:

As a dietary supplement, to establish adequate colonization, begin by taking 1 MICROBAC 1 tablet 2 to 4 times a day on an empty stomach up to 15 minutes before eating or at least 1 hour following meals, or as directed by a physician. After 2 weeks, decrease the dosage to 1 tablet 1 to 2 times a day. For children under 8 years of age, the suggested dosage is half of the adult.

**NOTE:** For Candida see CANDIDA PROTOCOL
